**Availability**

- All EzyJamb, CavKit and SlideSet products are made to order.
- Lead times apply to all EzyJamb, CavKit and SlideSet orders. Typical lead time from date of order to date of delivery is 15-20 working days. Longer lead times may apply in some cases. Always confirm exact lead time with EZ Concept prior to placing order.
- All orders are accepted by EZ Concept on a FIFO basis (first in, first out). For urgent orders, please refer to the point below.

**Expedited Orders**

- For urgent orders, manufacturing processes can be expedited on request. Expedited orders can be dispatched within 7-10 working days from receipt of order. A minimum charge of $150 or 40% total order cost, whichever is greater is applicable to expedited orders.
- Expedited orders are subject to operational requirements. Always confirm exact lead time with EZ Concept prior to placing order.

**Floor to Ceiling Doors**

- Floors to ceiling doors require no header jamb as the door extends the total height of the wall, when framing for this type of application allow the ceiling framing and drywall to carry on through to the adjacent space.

Hand all doors by standing outside and facing the door.
Installation Instructions

**Step 1**

Ensure that the stud opening is square and level and is the correct size.

Make sure the rough opening has double studs, the manufacturer strongly recommends wood studs or a minimum 16-gauge 130 metal studs on both sides of the opening. Studio recommends double studs for this installation.

When using concealed hinges, the stud must be notched at each hinge location to ensure proper fitment.

Head joiners as inserted in jamb:

- Locate head joiner and make flush with jamb so the head joiner is not seen.
- Remove the remaining head joiner out of the strike jamb into the end of the head (as shown) to receive the strike jamb.

**Step 2**

Fasten hinge side first, making sure jamb is level and as tight against stud opening as possible. Then screw at 8” centers up stile, screwing back through drywall into stud jamb. See Details ‘B’ and ‘C’.

Double screw all ends as Detail ‘D’ and beside hinge position - both above and below hinge if using concealed hinges as Detail ‘E’.

Ensure that the stud opening is square and level and is the correct size.

Make sure the rough opening has double studs, the manufacturer strongly recommends wood studs or a minimum 18 gauge .030 metal studs on both sides of the opening. Studco recommends double studs for this installation.

When using concealed hinges, the stud must be notched at each hinge location to ensure proper fitment.

**Step 3**

Fasten the final vertical section (strike jamb) below the head section. Ensure that the spacing between the two vertical sections are spaced evenly at the required distance.

Ensure the perforated side strips sit flat against the drywall to enable the jamb sections to be easily set into the wall surface. Finish the jamb with drywall compound.

All the corners must be paper taped and mudded as in Detail ‘F’.

Hang the door in position leaving 1/8” clearance from the top and the hinged side using the EzyJamb Standard or Invisible Hinges. Install the striker plate into position to align with the latch plate punching.

**Step 4**

The completed jamb is flush finished and can be painted in with the whole wall area to fully conceal any fixing, achieving simple clean lines around the door face.

No-Ha Door Handles

The RocYork® No-Ha 2.0 is the next evolution in door handles.

Integrating door handle and magnetic lock in one box; RocYork No-Ha 2.0 enables doors to be opened and shut whilst completely concealing the handle providing the same finish as the door and walls.

RocYork No-Ha 2.0 is part of the RocYork No-Ha collection, which includes the RocYork No-Ha Slide for sliding doors, RocYork No-Ha for drawers, cupboards and other accessories such as plates, WC handles (possible with No-Ha Nm 937).

The RocYork No-Ha cover plate is interchangeable so that it can be made to match the finish of the door panel. Also available in MDF or brushed stainless steel, the No-Ha handle has a solution for all interior appearances.

Completed Installation

No-Ha is the perfect solution for eliminating typical exposed hardware to operate doors. The flush finish final appearance is the perfect way to compliment EZ Concept trimless applications.

For further information or assistance in installation of RocYork products, please visit www.ezconcept.com/installation
Trims to suit pocket doors

CavKit is a flush finish that trims and caps the drywall edges around the door penetration, to create a pocket door that can be hidden when open and provide privacy when closed, without the look of bulky trims.

Designed to perfectly match the EzyJamb door jamb system for swing doors, the CavKit pocket door trim system allows you to create a consistent flush look across all of your interior doors.

*Door and hardware sold separately

Wall Stud
The SlideSet Pocket Door System has been designed to provide the absolute minimum of detail, giving the ability to completely conceal the door and give the impression that the door does not exist when open, and complete privacy when closed, adding a contemporary and architectural dimension to any project.

**SlideSet Features**
- Hardware concealed in door providing minimum gap between door/track
- Mounting plates allow for lift-up installation
- Stoppers with retention device installed inside track will retain door
- Ball bearing high quality rollers and aluminium track allows for smooth simple opening and closing operation.

SlideSet Pocket Door Assembly

**Installation Instructions**

**Step 1**
Identify the desired width and height of the door.

**Step 2**
Prepare door for concealed carriers.

**Step 3**
Prepare rough opening.

**Step 4**
Fasten Track to Split Stud Wall Assembly.

**Step 5**
Insert assembly into rough opening. Level, plum, shim, fasten.

**Step 6**
Insert floor guide.

**Step 7**
A. Insert rear stop and slide to rear.
B. Insert rear carrier and slide to middle.
C. Insert front carrier.

**Step 8**
A. Hang door and slide into pocket.
B. Insert front stop and slide to the rear a few inches.
C. Place filler track in gap and fix to the assembly.
D. Adjust and secure stops.

**Step 9**
Hang drywall.

**Step 10**
Install Closer Cap.

**Step 11**
Install Reveal.

**Step 12**
Tape and mud. Prime and paint.

  - Tape corners. Mud over perforated flange.
AccessDor cleverly conceals the appearance of the access panel by creating a flush finish to the drywall and eliminating the need for trims and architraves around the door. With only a 1/8” reveal between the door and Drywall, AccessDor blends seamlessly into the wall or ceiling, resulting in a frameless access panel.

Available in standard sizes or bespoke solutions, AccessDor can be custom made to fit your specifications. The EZ Concept range of AccessDor panels also includes a range of fire rated options and various latch choices to suit your security requirements, including screwdriver cam latch, key operated cam latch or touch latch.

### Installation Detail
Fast, Economical Recessed Window Pelmet Systems

Adding a new dimension to the internal perimeter of square-set interiors, EzyPelmet® is a two-piece steel pelmet system that makes window blinds disappear, cleverly conceals feature lighting and opens vast panoramas before your eyes. EzyPelmet offers a simple and discrete transition between the interior ceiling and external windows, curtain wall facades or the building structure.

The two-piece, pre-finished steel construction of EzyPelmet makes installation simple, compared to traditional pelmet systems that require time consuming construction methods.

EzyPelmet Features
- Contemporary, cleanview design.
- Flush-finish edge for square-set interiors.
- Completely concealed fixings.
- Does not require fixing from the top.
- Install from below after ceiling.
- Fastest method for creating window pelmets.
- Suitable for blinds, curtain, lights & more.

Cased Opening and Wall End Solution

Cased openings and capping of internal balustrades, window openings and internal partition wall ends are all made easy using EzyCap. Using a slip-fit fixing method, EzyCap simply slides onto the end of the drywall and doesn’t require preparation to paint in with the rest of the wall, significantly reducing time and effort during installation and presenting a crisp finished wall end.

As the strong and versatile alternative for stop ends, EzyCap is an economical way to cap wall ends and prevent damage from wear and tear in high traffic areas over time, keeping masterpiece designs intact for years to come.

Custom Finishing and Capping Made Easy

Inspired ceiling designs command attention using FastCap; this innovative solution easily inserts between the two sections of plasterboard to make light work of difficult recesses, drywall profiles and large oversized shadowlines.

Ideal for casing feature lighting or hardware, custom finishing and capping of plasterboard is made easy with the FastCap range of custom made finishing sections.

Custom FastCap

Custom size FastCap profile. Please specify sizes when ordering.

Shallow FastCap

Custom size shallow FastCap profile. Please specify sizes when ordering.

10' Length Standard

Custom Sizes available on request
Eliminate trims and create pure clean lines for square set interiors using EzyReveal®. Manufactured from cold rolled steel EzyReveal® provides a strong and secure reveal eliminating warping, twisting, cracking and damage from UV rays. Installation is simple. The strong and durable metal rollformed EZ Concept sections have pre-punched perforated sides for fixing and have a specially formulated surface finish for a seamless plasterboard connection.

**EzyReveal Features**
- Designed for quick and economical finishing of reveals from 13/16” to 10-1/2”.
- 18 standard variants to suit various applications.
- Specially formulated surface finish for seamless connection with plasterboard.
- EzyReveal can be used with PVC finish trim to create custom size reveals.

**Clean Contemporary Lines**

Modern interior design is characterised by clean lines and flush finishes. Shadowline sections provide simple yet effective details to interior spaces, such as ceiling perimeters, doorways and skirting boards, amongst other applications. To create a unique profile for your project EZ Concept presents Custom Shadowlines; made to meet your specific size requirements for the perfect fit in your design.

**Shadowline Features**
- Create the exact shadowline you need.
- Allow for variations in floor height or plaster thickness using a custom formed section.
- Heavy duty material to create a perfect straight and cleanline.
