Assembly Instructions

132 / 168 lbs

*DEPTURE ADJUSTMENT
Loosen screw "D" (fig. 5.1). Adjust the door leaf by rotating the screws "E" and tighten screw "D" (fig. 5.1). Repeat the adjustment on the other hinges as per sequence shown on fig. 5.

*VERTICAL ADJUSTMENT
Loosen screw "A" on all hinges (fig. 3.1). Proceed with the adjustment of the upper hinge (1). Adjust the hinge by rotating "B" then tighten the screw "A". Repeat the adjustment on the lower hinge (2) and finally on the central hinge in the middle so that the door leaf weight will be regularly distributed on all hinges.

It is extremely important to obtain a definite adjustment by acting gradually on all mounted hinges. After having reach the optimal adjustment with the screw, fix the screw to block the hinge without forcing.

*HORIZONTAL ADJUSTMENT
Adjust the door leaf by rotating pins "C" (fig. 4.1). Repeat the adjustment on all hinges as shown in the sequence (fig. 4).

*APPLICATION OF THE FRONT COVERINGS (fig. 6).

As an alternative, use the following screws:
- TSPC M5x MIN.35 UNI7688 DIN965
- TSPC M5x MIN.35 UNI6111 DIN963
- TSPC M5x MIN.35 UNI5933 DIN7991
- TSPC M5x MIN.35 UNI8113 DIN7991

*Fix the hinges in the relative door leaf millings (fig. 1) and fix them with the relative screws.

*Fix the door leaf to the jamb and insert the hinges into the millings (see picture 2). Fix the hinges with the specific screws.

*Set the hinges in the relative door leaf millings (fig. 1) and fix them with the relative screws.

*DEPTH ADJUSTMENT
Loosen screw "D" (fig. 5.1). Adjust the door leaf by rotating the screws "E" and tighten screw "D" (fig. 5.1). Repeat the adjustment on the other hinges as per sequence shown on Fig. 5.
