The SlideSet Pocket Door System has been designed to provide the absolute minimum of detail, giving the ability to completely conceal the door and give the impression that the door does not exist when open, and complete privacy when closed, adding a contemporary and architectural dimension to any project.

SlideSet Features
- Hardware concealed in door providing minimum gap between door/track
- Mounting plates allow for ‘lift-up’ installation
- Stoppers with retention device installed inside track will retain door
- Ball bearing high quality rollers and aluminium track allows for smooth simple opening and closing operation.

B. Insert front stop and slide to the rear a few inches.
C. Place filler track in gap and fix to the assembly.
D. Adjust and secure stops.

**Step 11**

Install Reveal.

**Step 12**

Tape and mud. Prime and paint.
CavKit is a flush finish that trims and caps the drywall edges around the
door penetration, to create a pocket door that can be hidden when open
and provide privacy when closed, without the look of bulky trims.

Designed to perfectly match the EzyJamb door jamb system for
swing doors, the CavKit pocket door trim system allows you to
create a consistent flush look across all of your interior doors.
